2013 Study of

Women's Intimate Care in Western Europe

This report presents findings from a benchmark study, providing subscribers with market insights on the overall marketplace for women's intimate care products in Western Europe (*France, Germany, Italy, Spain and the U.K.*) and includes a detailed examination of women's use of and interest in intimate care products, along with attitudes toward intimate hygiene and personal care. In addition to the survey conducted in Europe, the survey has also been conducted in BRAZIL and in the UNITED STATES. Topics addressed include . . .

- ▶ Women's Reproductive Health Landscape
- ▶ Product Focus: *product awareness and use, product attribute importance ratings, likelihood of future use of . . .*
 - Feminine Washes/Cleansers, Deodorizing Products & Wipes
 - Intimate Skin Care Lotions, Creams, Moisturizers
 - Douches
 - Vaginal Itch/Irritation Relief Products
 - Vaginal Lubricants, Moisturizers, Topical Sexual Enhancement Products
 - Vaginal Estrogen
 - Sanitary Protection & Urinary Incontinence Products
- ▶ Genital/Bikini Area Hair Removal Practices

REPORT EXCERPT:

Overall, fewer than two in ten Western European women report ever having discussed personal hygiene products/practices with a doctor or other medical professional. This practice varies widely however among women in the five European countries surveyed.

Ever Discussed Personal Hygiene Products/Practices With a Medical Professional
